ACKNOWLEDGMENT

We Are Thankful to ALMIGHTY ALLAH that by HIS Grace we have been successfully Complete our e-Project. We are representing our e-Project School Management System . We have tried to take all the relevant and necessary requirements into our consideration so that this project may become comprehensive.

We would like to thank Sir Sajjad for their guidance and for their precious Time

THANKYOU!

PROJECT REQUIREMENT

The School Mangtaa is in essence absolute web application to help overall administration of your school. School Mangtaa formulates the best use of information available to it and churns out the more useful essentials from a large amount of information available in the database thereby allowing you to take managerial decision leading to better management of resources and analysis of effectiveness of management decisions.

The Fee Module is the one of the most automated fee calculation module available in the system. Apart from being automated it is, at the same time, flexible enough to accommodate the varying nature of fee payments that most of the institutions come across.

The attendance module helps in keeping a tab on the attendance of students. By the use of this admin will have the full month view of the attendance of all the batches? The module offers a variety of reports to show attendance records. Percentage of presence calculations and the generation of relevant reports are fully automated.

Admin Module ease the administrative burden for the school office and teachers by centrally managing information on

Admin Module:

- **Group (computer/biology). Example: (7a, 7b, 7c).**
- **Allow pass student to go in new class only.**
- **Student INFORMATION.**
- **Batch information.**
- **Fee Chelan.**
- **Attendance Report.**
- **By monthly find all paid/unpaid student fees.**

Student Panel:

- **Student can print their Fee Chelan.**
- **Student can see his/her attendance.**
- **Student can see his/her results online.**

Public View:

He wants the website to be navigated through different pages like Home, contact information, About Us, Fee structure, login page for students Feedback and Queries and the ADMIN.

Project Plan

Using the tutorial, the examinee learns how a typical operating system functions, including schedulers, interrupt handlers, jobs, and system services.

We decided to start the work with the formation of database because a strong database is the key of good Application.

We tried to make out our Web Application User Inter face friendlier by which the User can easily handle all the Task.

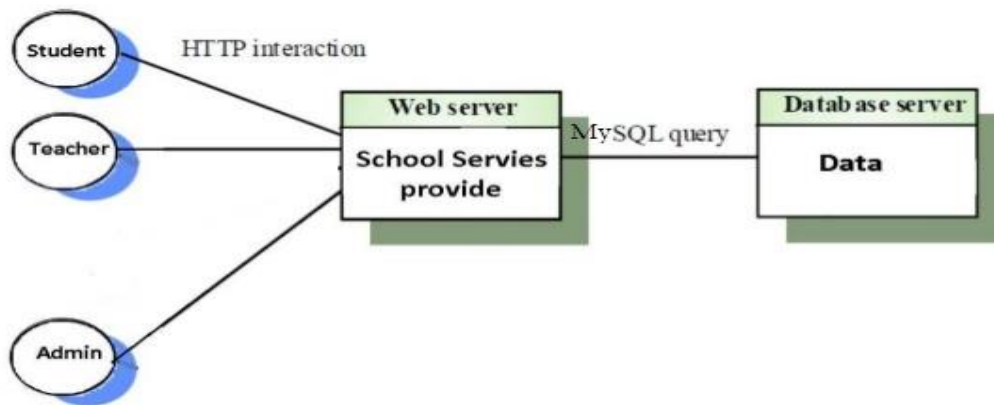

We also make a user guide to make our Application user friendly.

Proposed Solution

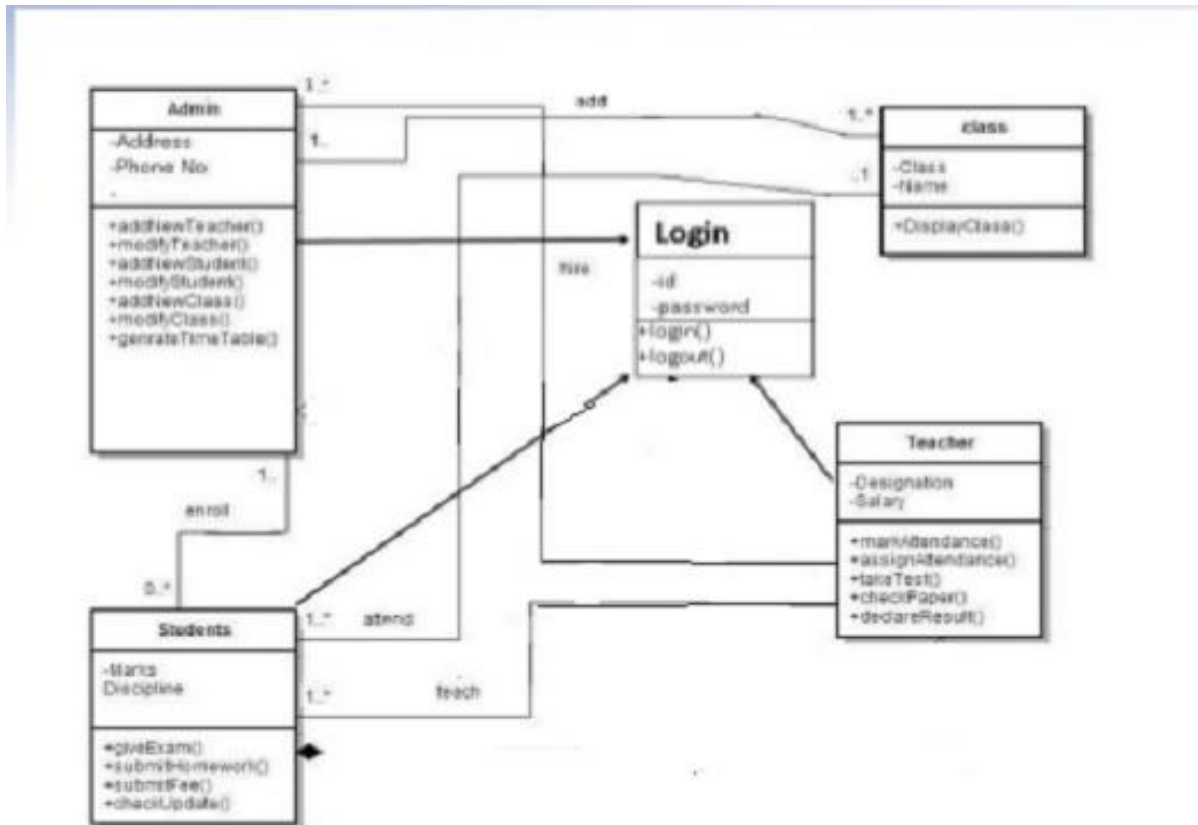

—

To bring the Automation in the system and to cope up in this competitive world, our client now want to automate the system. By using any admin staff member can generate all this result on few number of clicks. So he has approached us for developing the website. He wants the following list to be maintained and implemented for the website.

About The City School

Established in Karachi in 1978, The City School is today one of the largest private school networks in Pakistan with branches in all the major cities across the country. It currently has 185 schools in 52 cities with over 126,000 students in 458 owned and franchised schools. While its Head Office is in Lahore, its Regional Offices support a network of branches throughout Pakistan and overseas.

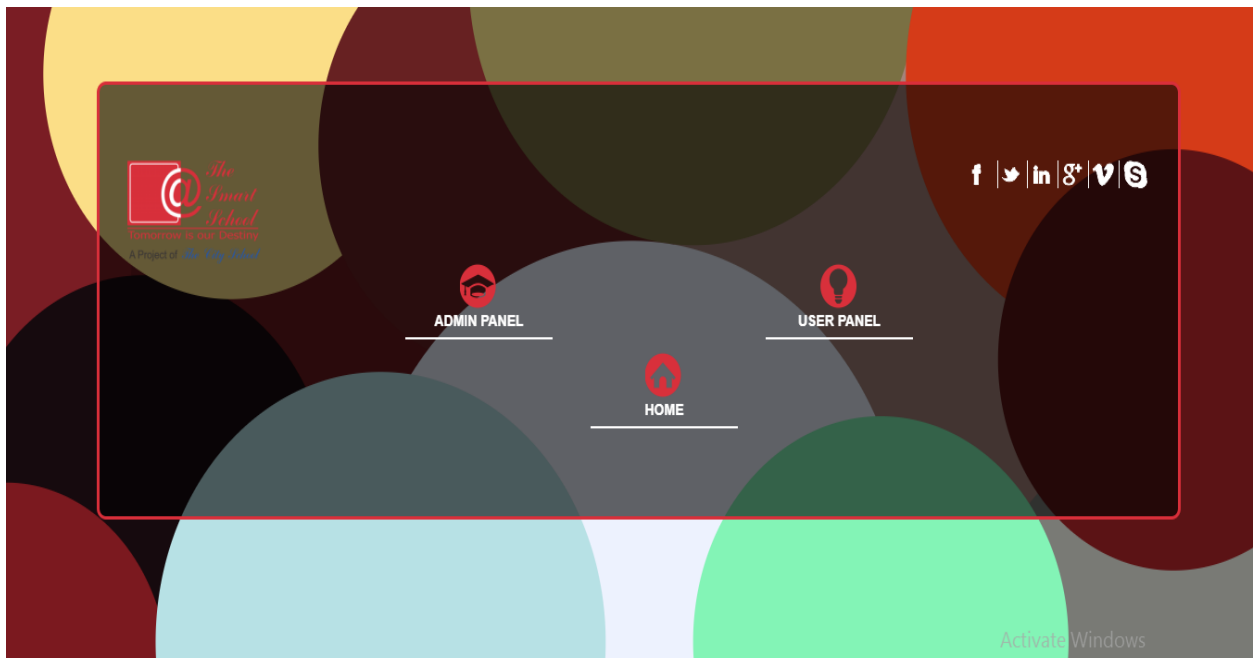

The City School continues to expand its reach to meet the demands for quality education. The knowledge and skills-based curriculum derived from the UK National Curriculum guides students from Nursery to Cambridge International Examinations (for 16 and 18 year age group), qualifying them for the IGCSE, and O and A Level examinations. The uniform implementation of the curriculum gives parents, students, and teachers the advantage of a smooth and efficient transfer from one school to another within the system.

— International Operations The City School has a well-established overseas School Development Programme. Its first venture abroad was in Dhaka, Bangladesh on the occasion of The City School's Silver Jubilee in 2002. At present, The City School has campuses in Dhaka, Dubai, and Jeddah. With the commencement of its overseas operation, The City School became the first premier international educational institution in Pakistan. Its future plans include the establishment of schools in the Arab States, South East Asia and Africa.
